SHEATH

KG23125

Material characteristics

Mix: SBR-NBR 70/75
Polymer: STYRENE-BUTADIENE with 65-70% recycled material
Use: Compression-injection
Nominal thickness: 0.5 mm approx
Hardness: 73 ± 3 Shore A (analogue) - 72 ± 3 Shore A (digital)
Density: 1.4 ± 0.03 gr/cm³
Breaking load: 40 Kg/cm²
Elongation at break: 200%
Operating temperature: -25/+70°C

Technical characteristics

Excellent adhesion to metal;
Good protection against atmospheric agents;
Good resistance to ozone;
Good resistance to ageing;
Sold in 2-part kits.
