

BIG BALLAST

STABLE,
ANCHORABLE,
SECURELY FIXED
TO THE GROUND

Big Ballast is the ballast specifically developed for ground-mounted systems, designed to offer superior performance and great versatility. With a 25-degree tilt and vertical layout, it adapts perfectly to large modules and beyond. Thanks to its height, Big Ballast allows easy grass cutting even in the lower part of the module. The tilt and vertical arrangement make it simple to install the modules and use the clamps, ensuring quick and precise assembly.
