THE IDEAL MOUNTING SYSTEM

FOR SOLAR PANELS
ON FLAT ROOFS

MADE TO LAST

OUR STORY

SINCE 2012 WE'VE BEEN LOOKING AT THE WORLD WITH A DESIRE TO IMPROVE IT, BY **PROVIDING STRAIGHTFORWARD, LONGLASTING SOLUTIONS** TO ANYONE WHO'S MADE THE ENERGY OF THE FUTURE THEIR BUSINESS.

Sun Ballast® was established by its CEO, **Maurizio Iannuzzi**, who has extensive experience in the installation of photovoltaic plants, and has been developing mounting systems for flat roofs for more than ten years to make installation operations easier and quicker.

This is our way of contributing to change, and giving safe, solid, tangible support to the energy of the future. **Support that is made to last.**

As a Benefit Corporation involved in dozens of social projects, Sun Ballast® sets the global standard in the field of solar mounting structures for flat roofs, and the company's innovative concrete ballasts support thousands of photovoltaic systems throughout the world.

THE IDEAL MOUNTING SYSTEM FOR FLAT ROOFS

OUR CONCRETE BALLASTS HAVE REVOLUTIONISED THE INDUSTRY OF SOLAR MOUNTING SYSTEMS, AND SET THE STANDARD FOR ALL PV SYSTEMS INSTALLED ON FLAT ROOFS.

Safe, solid and versatile Sun Ballast® systems combine support and ballast functions into one unique feature. This simplicity underpins the global success of solutions from Sun Ballast®.

Our ballasts are made with premium materials and do not require any drilling to affix them to roofs. Simply position them, secure the panel to the embedded fasteners and installation is complete.

Developed from Sun Ballast's passion for research and development of innovative real-world solutions, our systems are available in a wide range of tilt angles and make the installation of PV systems on flat roofs extremely quick, easy and safe.

MADDE TO LAST

LONG LASTING SOLUTIONS

ALL BALLASTS PRODUCED BY SUN BALLAST® ARE MADE OF HIGH-STRENGTH CONCRETE, AND CONTAIN FASTENERS AND A SPECIAL METAL CORE. BECAUSE STRENGTH ISN'T OPTIONAL

Premium quality raw materials and processes.
Ballasts produced by Sun Ballast® are made of high-strength concrete.

The metal core within the structure provides extra resistance to mechanical strain, and the M8 threaded inserts enable panels to be secured even faster.

Sun Ballast® systems are tested in a wind tunnel and climatic chamber, and ensure a perfect balance between sturdiness, roof load and wind resistance.

Guaranteed for life, delivering reliable performance every time.

RESISTING THE WIND

1 **Single-Row** 

Page 16 

Simple, fast and versatile: the Single-Row system is available in a wide range of models, and allows modules to be positioned vertically, horizontally or with East-West orientation by freely modulating the distance between rows.

2 **Zero** 

Page 18 

Flexible mounting, adjustable height: the Zero system allows modules to be fixed on both sides while optimising available space and the visual impact of the system.

3 **Est-West** 

Page 20 

Simple, stable, and modular: the East-West system can be configured with all ballast ranges and allows you to optimize available space while ensuring stability and wind resistance.

4 **Sail** 

Page 22 

More power in less space: the Sail system allows up to three or six rows of ballasts to be placed, maximizing the entire flat roof area.

5 **Connect** 

Page 26 

Low load, high strength: the Connect system combines each PV ballast into a single grid, reducing the load on flat roofs and increasing wind resistance.

6 **Mono-XL** 

Page 28 

Quick, strong, flexible: the Mono-XL system allows for the vertical mounting of large modules, modulating the distance between rows and ensuring quick and secure placement.

7 **Industrial-XL®** 

Page 30 

Safe, solid and cost-effective: the Industrial-XL® system is dedicated for large panels used for commercial installations and provides safety, tightness and cost-effectiveness.

8 **EasyWest®** 

Page 32 

Solid, universal, ultra-light: the EasyWest® lattice system minimizes roof load and provides panels of any size with exceptionally high wind resistance.

9 **Big Ballast** 

Page 34 

Stable and high-performing: Big Ballast is the ideal ground-mount ballast even for large modules, with a 25° tilt and vertical installation that ensures stability, quick assembly, and easy maintenance of the ground beneath the panels.

10 **Fortis** 

Page 36 

High strength, lightweight design: Fortis withstands wind and critical loads, ensuring consistently secure installations, reduced roof loads and long-term high performance.

INDEX OF SUN BALLAST® ACCESSORIES

1 Central Clamp

SINGLE-ROW

SINGLE-ROW

1

SIMPLE,
FAST, AND
VERSATILE

The Single-row system is a simple and extremely versatile solution: available in a wide range of tilt options from 3° to 30°, the ballasts allow panels to be fixed vertically, horizontally, or with East-West orientation, freely modulating the distance between rows and ensuring quick and easy installation, even in the presence of obstacles.

TILTS

ZERO[®]

ZERO

2

LOW LANDSCAPE IMPACT

Equipped with high wind resistance, the structures of the Zero system make it possible to effectively manage landscape constraints, maximizing the available space and the aesthetic impact of the PV system.

The installation and design phases become much simpler: the structures allow the modules to be fixed on the long side and/or on the short side, either by connecting them into a single grid or by positioning them in single rows with variable height.

VERTICAL
HORIZONTAL

EAST-WEST

EST-WEST

3

SIMPLE,
STABLE AND
MODULAR

Optimized spaces, guaranteed stability: the East-West system allows panels to be mounted both horizontally and vertically, and is compatible with a wide range of ballasts from 3° to 30°. Easy and quick to install, the system makes the most of all available surfaces, quickly bypassing obstacles and ensuring high resistance to wind and snow loads.

SAIL

SAIL 5°

4

LOTS OF ENERGY IN LIMITED SPACE

Available in two versions of 5° and 10°, the Sail system allows you to position up to six consecutive rows of photovoltaic panels, adjusting the distance between the modules and optimising all the available space as much as possible. The ballasts can also be used in single rows, and ensure quick and easy obstacle management.

MONOXL

NEW

For **large-size** modules

MONO-XL

6

QUICK,
STRONG,
FLEXIBLE

Available with 5° and 10° tilt options, Mono-XL ballasts offer large photovoltaic panels a simple and versatile solution: vertical fixation ensures strength and high stability levels for the modules. The ability to freely modulate the distance between rows ensures quick placement even in the presence of obstacles on the roof.

The new Sun Ballast® solution
for **ground-mounted PV systems**

BIG BALLAST

9

STABLE,
ANCHORABLE,
SECURELY FIXED
TO THE GROUND

Big Ballast is the ballast specifically developed for ground-mounted systems, designed to offer superior performance and great versatility. With a 25-degree tilt and vertical installation, it perfectly accommodates large-size modules and more. Thanks to its height, Big Ballast allows easy grass cutting even beneath the lower part of the module. The tilt and vertical arrangement make module installation and the use of clamps simple, ensuring quick and precise assembly.

FORTIS

10

DESIGNED TO WITHSTAND. EVERYTHING.

The Fortis system is a durable and reliable solution, engineered to withstand wind pressure over time, even in the most challenging conditions. Universal and compatible with all modules, it enables safe installation while reducing roof loads. The structure, lightweight yet incredibly strong, ensures long-lasting reliability and top performance, delivering a solution built to last and guaranteed for life.

CABLOWIND®

THE STRENGTH OF ORDER

CABLOWIND® is the product that further enriches the range of accessories offered by Sun Ballast® and combines two distinct functions in a single element: a channel, which allows the correct housing of cables, and additional ballast, to ensure further stability for wind resistance of the photovoltaic system.

CABLOWIND®

For large horizontal module installation

ADDITIONAL COMPONENTS FOR THE SYSTEMS

NO-FLEX®

LONG LIFE FOR
LARGE-SIZE PANELS

Sun Ballast® No-Flex® has 2 formidable strengths:

1. The addition of a central ballast to the module increases resistance to wind and snow loads.
2. It meets the support parameters required by module manufacturers and, at the same time, by supporting and securing the modules at 6 points instead of 4, it improves structural hold even under extreme and repeated stress over time.

NO-FLEX® CONNECT

NO-FLEX® MONOFILA

STANDARD ACCESSORIES

CLAMPS AND RUBBER MATS

Stable panels, intact surfaces: aluminium clamps enable panels to be secured quickly and safely, and roof membrane sheets placed under ballasts optimise their effectiveness by further protecting all support surfaces.

INSTALLATION SURFACES

All Sun Ballast® solutions enable photovoltaic plants to be implemented on any type of flat surface, from small tiled roofing on homes and blocks of flats through to large roofs with membranes on industrial buildings.

The absence of fastening slots, along with a wide range of height and tilt options, makes the ballasts extremely versatile, and enables fast, simple and safe installation on all types of roofing.

MEMBRANES

Membranes give many buildings a high level of protection and, thanks to the absence of penetrations, the ballasts made by Sun Ballast® safely retain all of their waterproofing properties.

FLOORING

As well as there being no need for penetrations, the ballasts are placed on protective rubber membrane sheets, ensuring a precise installation with no scratches, even on the most delicate surfaces.

INSTALLATION SURFACES

GRAVEL

The ballasts can be placed directly onto gravel and the underlying roofing, ensuring fast, simple and safe installation.

GREEN ROOFS

Sun Ballast® has ideal solutions for any type of vegetation. The ballasts are not liable to corrosion, and thanks to the adjustable height from the ground, they can give excellent protection against direct light and bad weather.

GROUND

Once some basic preparations have been made for ground installation, the ballasts reduce installation times and ensure a high level of stability and wind resistance.

SOLID AS MOUNTAINS

FULL SUPPORT FROM DESIGN THROUGH TO INSTALLATION

THE SUN BALLAST® TECHNICAL SERVICE ENSURES THAT ALL CUSTOMERS HAVE FAST, FREE ASSISTANCE IN ALL PV PLANT IMPLEMENTATION PHASES. GUARANTEED SAFETY, EXPERTISE AND QUALITY.

Fast, free and professional - the Sun Ballast® service provides comprehensive support from the initial design phase until the last clamp is secured.

Customers benefit from ongoing support which provides calculations and practical tips for using the configurator and all technical documentation useful for implementing solid, safe and reliable photovoltaic plants.

With over 20 professionals, the Sun Ballast® technical department produces thousands of technical reports every day, fully supporting installers, designers, EPCs and distributors all over the world.

MADE TO LAST

INTERNATIONAL DISTRIBUTION NETWORK

QUICK INSTALLATION, QUICK DELIVERY
THE SUN BALLAST® DISTRIBUTION NETWORK HAS DOZENS OF INTERNATIONAL PARTNERS, AND BALLASTS ARE AVAILABLE IN OVER 40 COUNTRIES THROUGHOUT THE WORLD.

Quality and simplicity, plus ongoing availability and quick delivery - providing customers with professional support also means ensuring a commercial service and logistics that are quick, efficient and punctual.

To achieve this, Sun Ballast® ensures that all partners have a team of operators dedicated to providing ongoing support throughout the purchasing phase, from when an estimate is requested through to delivery of the materials.

The Sun Ballast® distribution network has dozens of international partners to ensure a fast, reliable delivery service in over 40 countries throughout the world.
